

## 155 mm BI-MODULAR CHARGE SYSTEM

The bi-modular charge system is used for all previously mentioned 155 mm projectiles. It consists of following two types of charges:

- BC-E charges used for short range (zone 1-2)
- TC-F charges used for long range (zone 3-6)

Bi-modular system covers firing range of 155mm projectiles from 5 up to 42 kilometers when fired from 52 cal. gun (with HE ER FB-BB projectile).
